Dec 14, 2021 – March
15, 2022

Aurora partners are invited to the webinar series on Open Educational Resources starting December 14th. The series are meant to illustrate a strategic part of universities' improvement in the sector of Open Education. The OER group wants to sensitize teaching staff and students in the Aurora network for Open Educational Resources. It aims to raise awareness within Aurora universities on the many possibilities that Open Educational Resources offer. OER stimulates collaboration between teachers by reusing and remixing open materials. Students can participate in developing new and open educational resources.

In the webinars, the motto "content is king" will be used to emphasize the importance of free access to content, benefits and conditions of the creation and provision of learning materials. Grab this opportunity to learn more about Open Educational Resources. To follow a webinar, click on the Zoom link above and use the meeting ID and password. Check out the different webinars on page 2.

Program for the Academic Year 2021–2022

The lectures will take place on Zoom and will be recorded afterwards. You can use the zoom meeting codes and passwords for all sessions.

December

14 December 2021, 12:00 am –13:00 CET

Introduction to Open Educational Resources (OER): benefits & licences & search engines
Anke Petschenka (UDE), Sylvia Moes (VU Amsterdam), Ortrun Gröbinger (U Innsbruck)

January

18 January 2022, 12:00 am – 13:00 CET

OER-enabled Pedagogy for teaching and learning in the digital age
Daniel Otto (UDE)

February
